2-4 Overview of new acquisitions (Scheduled as of August 1, 2017)

Luxury-grade office environments and ample facilities

- Office spaces occupy the 30 stories of the building that run from the 6th to the 35th floors. Standard floors have offices for lease at an average size of approx. 1,000 tsubo, providing flexible workspaces with a ceiling height of 2.8 meters.
- The building has three types of high seismic capacities and boasts an emergency power generator – a measure that ensures business services can resume under any conditions.
- CASBEE has awarded the building the highest rank "S".

Biodiversity-conscious open spaces

In the open space of about 6,000 m², there is the "Oval Plaza" garden that serves as an oasis in the city with the comfortable sound of a stream, and the "Step Garden" with greenery that provides an enjoyable seasonal atmosphere, that together form a rich urban space where people can gather.

Andaz Tokyo

Hyatt's boutique lifestyle hotel is tailored to the individual. Andaz means "Personal Style" in Hindi, helping guests to know their surroundings more intimately and leave feeling like a local.

Main Dining on the 51st floor
"Andaz Tavern"

47th to 50th floor guest rooms

- In a comparison of GDP among the world's metropolitan areas, Tokyo outperformed New York and London to rank as the world's largest.
- In terms of the world's urban population, Tokyo is projected to maintain its rank as the world's largest metropolitan area.

2-20 Competitive strength of Central Tokyo

Trend of net migration

- Tokyo's 23 wards have experienced net population growth for 20 consecutive years since 1997, indicating a high level of consistent net population growth even in comparison with the other major cities in Japan.

(Source) Prepared by the Asset Manager based on "Report on Internal Migration in Japan" by the Statistics Bureau, the Ministry of Internal Affairs and Communications.

Trend of urban land price index (average of all uses)

- Land price level of central Tokyo has consistently surpassed the level of March 2005, showing a clear difference from those of other metropolitan areas in Japan that have been on a declining trend.
- However, since investment should be made carefully after asset values have surged, we intend to exercise prudence concerning investment prices.

4. Business environment recognition & MHR's policy/strategy

4-1 Business environment recognition

Real estate market / Lending attitude

- Low vacancy rates and gradual increase of rents of office buildings in central Tokyo is ongoing.
(Forecast of Office Market Trends Research Committee for Tokyo's five central wards)
 - ⇒ Vacancy rate (forecast): 3.7% in 2016 → 4.0% in 2018
 - ⇒ Rent index (forecast): 111 in 2016 → 117 in 2018
- Although cap rates remain at historically low levels, the rate of decrease seems more moderate.
(Japan Real Estate Institute's "The Japanese Real Estate Investor Survey")
 - ⇒ Class A buildings in Marunouchi
Cap rate: 3.4% in April 2016 → 3.3% in October 2016
- Lending attitude toward the real estate industry continues to be highly positive.

Interest rate trends / Macro environment

- Long-term interest rates remain low due to the monetary easing policy and the core CPI rate of increase is at a low level.
 - ⇒ 10-year bond rates: +0.050% (February 28, 2017)
 - ⇒ Core CPI: +0.1% (January 2017)
- In the July 2016 preliminary business conditions composite index, the leading index was at 105.5 (0.6 PT increase from previous month) and the coincident index was at 114.9 (0.7 PT decrease from previous month). There seems to be an improvement trend before and after the US presidential election.
- The growth of money stock is limited.
The issue of wage increases can be seen from the consumer confidence survey and the monthly labor survey. Future trends will be scrutinized.

- Rents of office buildings in central Tokyo are forecast to continue moderate rise for the time being, but as the supply increases, the rate of rent increase may gradually moderate.
- Cap rates remain at low levels and sufficient attention is required for acquisition pricing.

- There seems to be an improvement trend in the global business sentiment, but caution should be exercised as there are also instability factors.
- Interest rate level is expected to remain low for the time being partially due to the introduction of the yield curve control policy by the Bank of Japan.

4-2 MHR's policy/strategy

External growth policy

- Target premium properties in Central Tokyo and aim for annual external growth of 30 billion to 50 billion yen by best utilizing sponsors' pipeline. (Set target yield at the upper 3% range for NOI-based yield and 3.0% or higher for after-depreciation-based yield.)
- Focus on portfolio size expansion in order to further enhance stability and liquidity as an investment corporation while also considering disposition depending on conditions.

Internal growth policy

- Steadily achieve the revision of pass-through type properties with rent increases while maintaining the ratio of the fixed rent master leases at current level.
- Properly implement office property repairs as necessary and conduct value-enhancement renovation for residential properties if such is judged to be cost-effective (there are no office properties that require large-scale renewal in terms of building age or competitiveness).

Financial management policy

- Target LTV (book value basis) in the mid 40% range (though it may temporarily exceed the target level as necessary) in order to secure property acquisition capacity while maintaining a durable position for times of economic slowdown.
- Target average remaining duration of debt of 4 years or longer, and gradually increase the fixed rate ratio at the appropriate timing.
- Seek to raise ROA by utilizing free cash for property acquisition rather than reserving it more than necessary.

Policy regarding the entire investment corporation

- **Promote portfolio size expansion while maintaining an asset quality level that is one of the best in the industry and aim for continuous improvement of dividends and NAV per unit**

(Note 1) For property tax, city planning tax and depreciable assets tax, MHR charges the amount of property taxes assessed and determined applicable to the fiscal period to expenses related to properties. Registered owners of properties in Japan as of January 1 are responsible for paying property taxes for the calendar year based on assessments by local governments. Therefore, registered owners who sold properties to MHR were liable for property taxes for the calendar year, including the period from the date of the acquisition by MHR until the end of the year. MHR reimbursed sellers of properties for the equivalent amount of property taxes and included the amount in the acquisition cost of real estate.

(Note 2) "Other expenses" denotes the sum of custodian fees, rent expenses, and other lease business expenses (residential property management costs, and other property-related miscellaneous expenses) in aggregate.

(Note 3) Property acquired during the relevant period. "Annualized NOI/ Acquisition price" was calculated by taking into consideration the changes in acquisition price during the relevant period.

"Annualized NOI" denotes the value which is based on the acquisition price as of the end of the relevant period.

Sustainability policy

Mori Hills REIT Investment Corporation and Mori Building Investment Management Co., Ltd. will engage in real estate investment and management, taking into consideration "the environment," "Business Continuity Planning (BCP)" and "maintaining and enhancing asset value," based on the Mori Building Group's "Vertical Garden City" urban design philosophy as the ideal model.

The environment

- Promotion of cities and nature existing in harmony by creating microcosms of nature through promotion of landscaping
- Promotion of low carbon cities by introducing various energy-efficient systems
- Promotion of resource recycling based on the 3Rs (reduce, reuse, and recycle)

Business continuity planning ("BCP")

- Enhancement of earthquake resistance, disaster supply storage facilities, emergency power sources and other tangible measures
- Enhancement of the property management structure in the event of a disaster and other intangible measures

Maintaining and enhancing asset value

- Investment in high-quality real estate
- Implementation of appropriate asset value enhancement construction work

Common policies

- Compliance and maintenance of management system
- Implementation of sustainability education and awareness of building activities
- Disclosure of sustainability information

ARK Hills South Tower receives fiscal 2015 Award for Minato City Local Green City Development

The "Award for Minato City Local Green City Development" was established in fiscal 2004 to recognize residents and business operators with environmental consideration and outstanding landscape planning as well as maintaining greenery. The award expresses gratitude for such cooperation in community landscaping and hopes to promote further development of a green city.

<Environmental Policy >

1. Cities and nature existing in harmony

We create pleasant, verdant spaces where the chirping of birds and the singing of insects can be heard by leveraging the vertical plane in cities and creating microcosms of nature on the ground where people can commune with nature. Through these spaces we will foster environmental communities for people.

2. Low carbon cities

We will create cities with excellent environmental performance by matching energy-efficient systems to compact cities in which diverse urban functions are combined into vertical infrastructure. We will continue efforts to lower carbon emissions from operation through comprehensive, quality management of communities.

3. Resource recycling

We aim to build resource-recycling cities by promoting the 3Rs (Reduce, Reuse, and Recycle).

4. Compliance and maintenance of an environmental management system

We will always keep our eyes on the trends in environment-related laws and regulations and adapt to any changes. Also, we will put in place and maintain an environmental management system in order to continuously improve our environmental enhancement activities.

5. Environmental education and awareness building activities

We will implement environmental education and awareness building activities for employees in order to improve the effectiveness of our environmental enhancement activities. We will also use our facilities to conduct environmental awareness building activities aimed at facility users.

6. Disclosure of environmental information

We will communicate with society by making efforts to disclose information, such as the environmental philosophy and policy, and information about environmental activities.

5-11 Organization Structure

Corporate governance

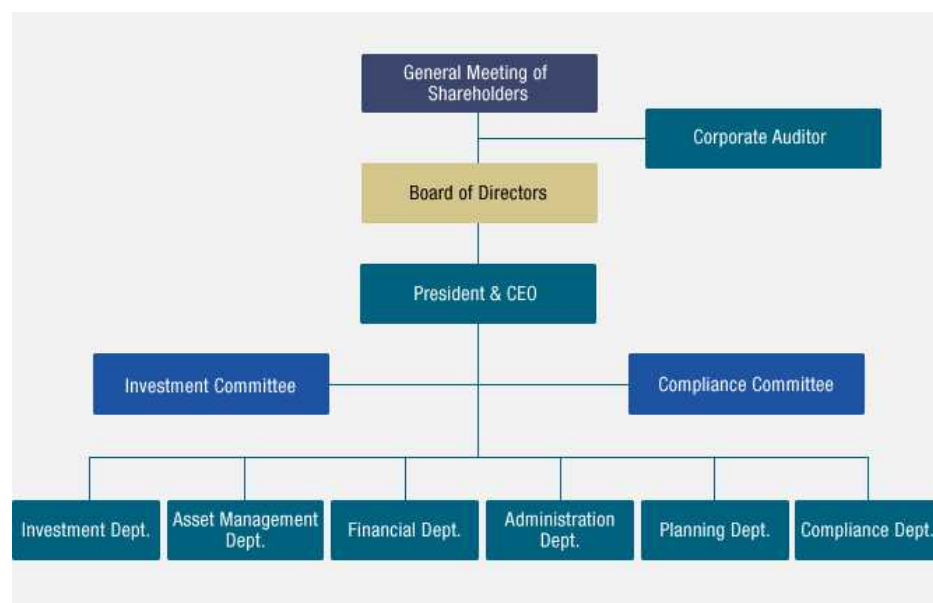

Corporate governance

MHR shall have at least one executive director and at least two supervisory directors (or, at least one more than the number of the executive directors), and the board of directors shall be comprised of the executive directors and supervisory directors.

In addition to a general meeting of unitholders, which shall be composed of unitholders, MHR's structure consists of one executive director, three supervisory directors (Note), the board of directors and an accounting auditor.

Structure of asset manager for the Investment Corporation

MHR entrusts the management of its assets to the asset manager. The following is the organizational structure of the asset manager.

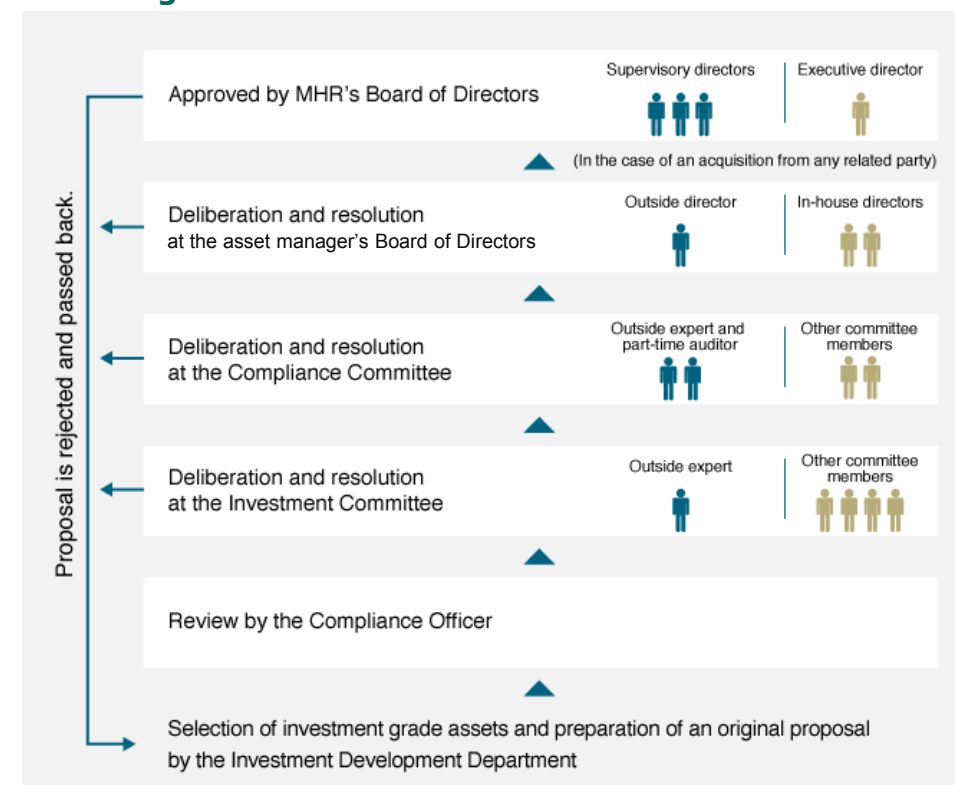

(Note) The term of office for three supervisory directors will expire at the time of the end of MHR's seventh general meeting of unitholders scheduled as of April 21, 2017. Consequently, proposals regarding the appointment of two supervisory directors will be submitted.

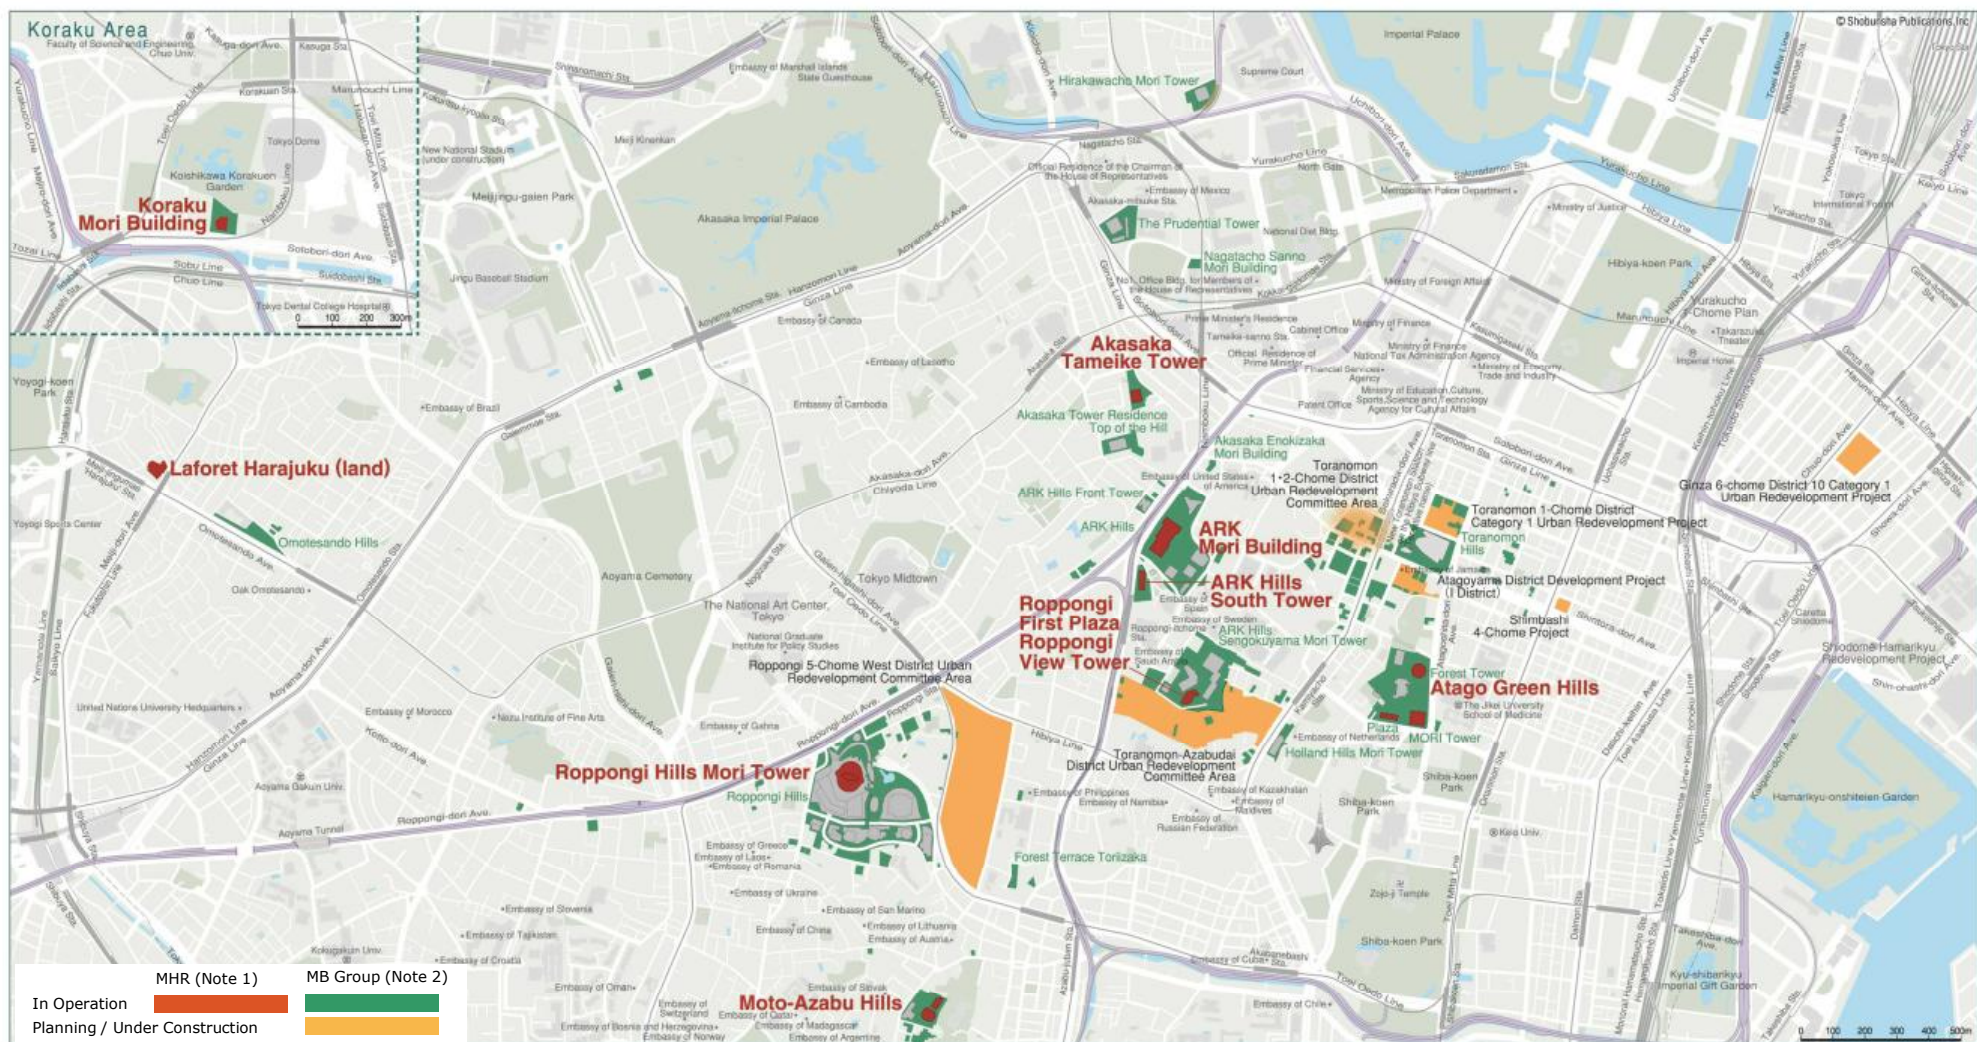

Compliance

The asset manager shall perform its business in good faith and with the due care of a prudent manager for MHR in line with the purpose of the investment management business, and be well aware that failure to ensure thorough compliance, especially inappropriate transactions or transactions involving conflicts of interest with the sponsor company group, may undermine investors' trust in the securities markets, the corporate management base of MHR and the asset manager. Therefore, the asset manager will use its efforts to prevent any negative impact from transactions involving conflicts of interest and carry out strict compliance as follows.

Process to Counter Transactions Involving Conflicts of Interest
